

OPERATION SMILE STUDENT PROGRAMS AT A GLANCE:

# INVESTING IN OUR FUTURE

## OUR LEADERSHIP CONFERENCES, OPPORTUNITIES EMPOWER THE NEXT GENERATION OF GLOBAL HEALTH CHAMPIONS

For almost 40 years, Operation Smile has provided transformational surgical care to hundreds of thousands of patients born with cleft lip and cleft palate.

But it just hasn't changed the lives of its patients: Operation Smile has changed the lives of students at every age, at every level, around the world.

Empowered by Operation Smile Student Programs, youth effect global change through advocacy, leadership, service and education. Through local club involvement and international leadership conferences, we train these bright, compassionate students to serve others who lack access to medical care. They advocate for safe surgery, coordinate fundraisers and donation drives – and some even serve as health care educators or storytellers during medical missions.

Inspired by their involvement with us, we're proud to say these students often become the next generation of medical, dental and global health professionals.
